FACT SHEET

Managed Private Cloud

Powered by Nutanix

As organizations reevaluate virtualization strategies and modernize infrastructure, choosing the right platform is only part of the challenge. **Managed Private Cloud powered by Nutanix combines a modern private cloud platform with TierPoint expertise to help you plan and execute your migration, simplify ongoing operations, and build an environment that can evolve with your business.**

Simplify Your Migration

TierPoint helps plan and execute your move to Nutanix, from designing the target environment through workload migration and implementation.

Optimize Private Cloud Operations

Nutanix brings virtualization and infrastructure management together, while TierPoint provides ongoing monitoring, lifecycle management, troubleshooting, and support.

Maintain Flexibility for What Comes Next

Choose a modern private cloud platform that gives you greater flexibility as workload and infrastructure requirements evolve, with the ability to connect to a broader hybrid cloud strategy.

Enterprise Technology. TierPoint Expertise.

Flexible Infrastructure & Storage

Build around your workload and performance requirements with dedicated infrastructure, flexible storage options, and an architecture designed to evolve as your needs change.

Data Protection Options

Extend your environment with encryption, backup, storage, and replication capabilities, with additional disaster recovery solutions available from TierPoint.

Integrated Management

Nutanix AHV and Prism provide an integrated virtualization and management foundation designed to simplify day-to-day infrastructure operations.

Enterprise Availability & Scalability

Highly available clustered infrastructure supports critical workloads and provides room to scale as capacity requirements change.

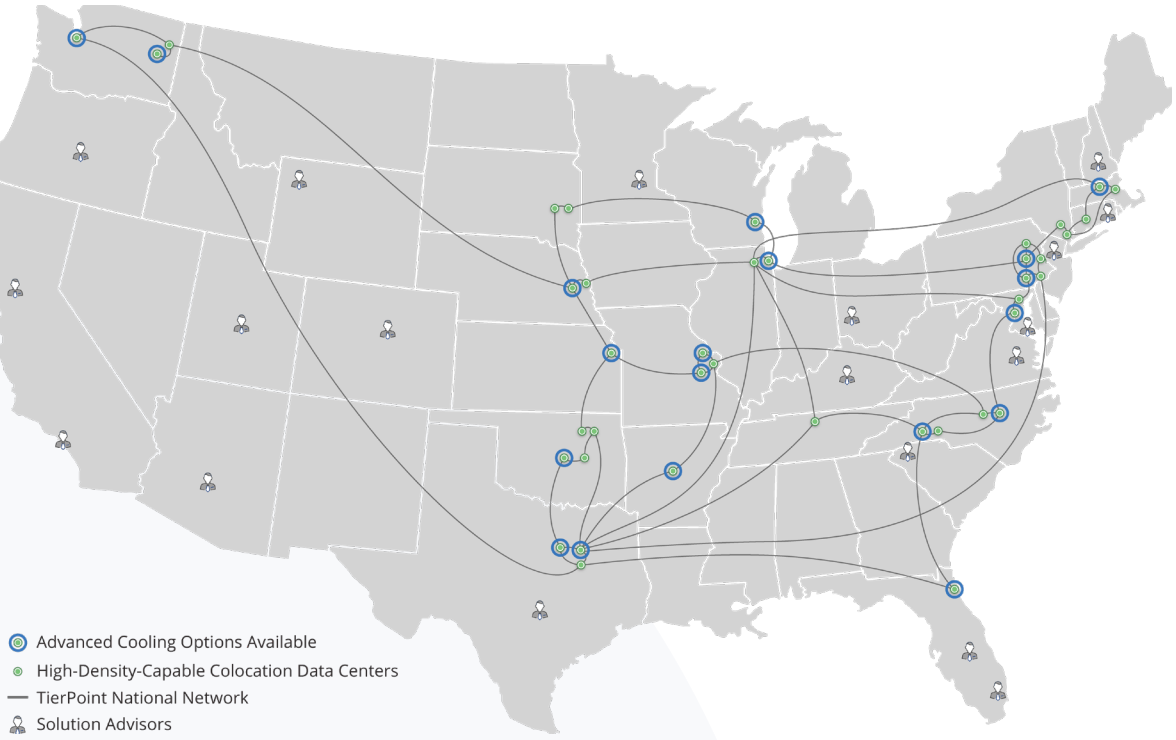
Secure, Compliant, and Connected. Managed Private Cloud by TierPoint.



Secure and Compliant Infrastructure

Your private cloud runs in TierPoint's enterprise-grade data centers, with industry-leading security practices including 24x7x365 onsite personnel, robust two-factor authentication with biometric systems, video surveillance, secure mantraps, and strict access protocols.

Our Data Centers Compliance Attestation

Every TierPoint data center maintains compliance certifications, attestations, and registrations including **ISO 27001, SOC 1 Type II, SOC 2 Type II, HIPAA/ HITECH, GLBA, PCI DSS v3.2.1, NIST SP 800-53, SOC 2 + HITRUST, ITAR, and Privacy Shield.**

Choose the Cloud That's Right for You

TierPoint is cloud agnostic. We help organizations find the right mix of cloud solutions to meet their unique workload needs. Whether it's public, private, hybrid, or multicloud, our focus is finding the best venue for each workload and application. With Managed Private Cloud powered by Nutanix, that can mean running mission-critical workloads, databases, business applications, and high-performance workloads in a secure and compliant TierPoint data center. This hybrid flexibility helps organizations balance performance, resiliency, security, and cost while giving them the flexibility to adapt as business and technology requirements evolve.

Explore What's Next for Your Private Cloud Today

Whether you're reevaluating your virtualization strategy, planning a migration, or looking to simplify private cloud operations, TierPoint can help you identify the right path forward.
