

# Cloud Connect Express

## Connect to Hyperscale Clouds Reliably and Quickly

Bypass the internet with a private, dedicated network connection to your workloads in public clouds from any TierPoint data center with Cloud Connect Express.

This easy and cost-effective managed network service for public cloud connectivity makes it convenient for you to improve the reliability of your cloud connections with higher bandwidth and lower latency, support your network security requirements, and rapidly connect to leading public cloud providers.

With the rapid growth of public cloud services in combination with legacy systems and hosted private clouds, direct connectivity is a key success factor for hybrid cloud and multi-cloud strategies.

## Managed Cloud Connectivity Gets Your Data Where It Needs To Be

Whether you're migrating to the cloud for the first time or just realigning your hybrid strategy, TierPoint Cloud Connect Express fosters your business's agility and network performance with direct connections between the infrastructure you own or use in any TierPoint data center – and your workloads on Microsoft Azure, Amazon Web Services (AWS), Google and Oracle clouds. You can choose the data that utilizes the connection and how it is routed. Redundant connections for high resiliency are available.

### Rapid Provisioning

Avoid the wait of a months-long network buildout and begin to execute on your strategic plans to grow your business in days.

### Simplify Complexity

Connecting to a public cloud from Tier 2 and Tier 3 markets can be complex. From procurement to equipment to implementation, TierPoint manages it for you.

### Improve Reliability

Secure a dedicated connection which creates a more consistent and reliable network experience than the internet for users, replication, disaster recovery, and more.

### Cost-Effective

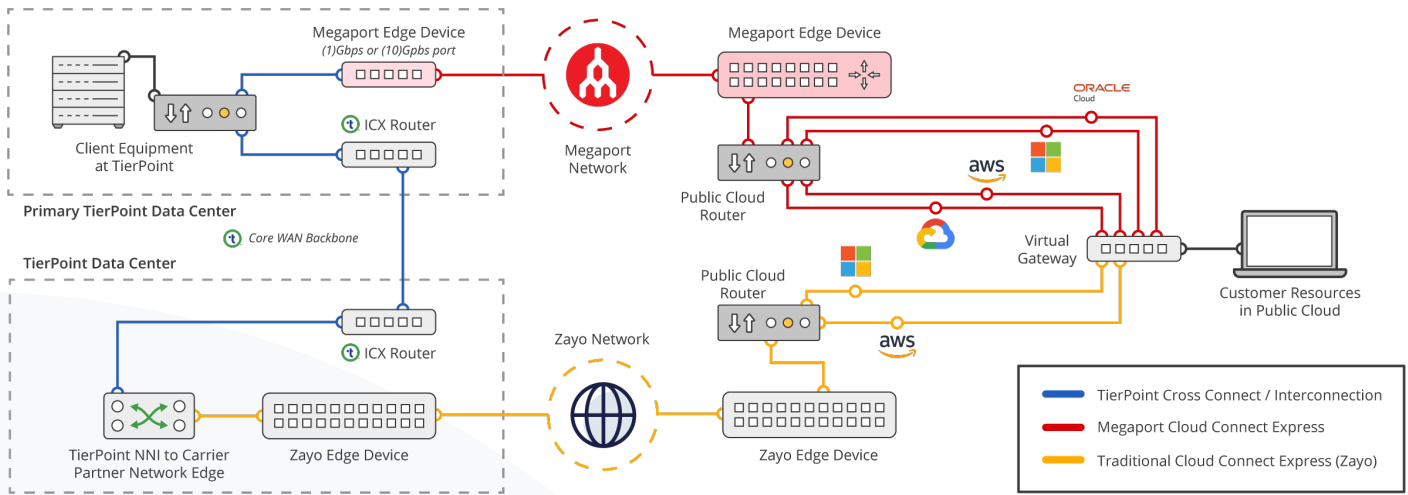

TierPoint provides a cost-effective solution to enable flexible, affordable direct connections to public clouds for our customers.

### High Performance

Optimize your network path to cloud onramps and bypass public internet congestion, high latency, and packet loss – with high-bandwidth, redundant transport to your public cloud workloads.

### Increase Flexibility

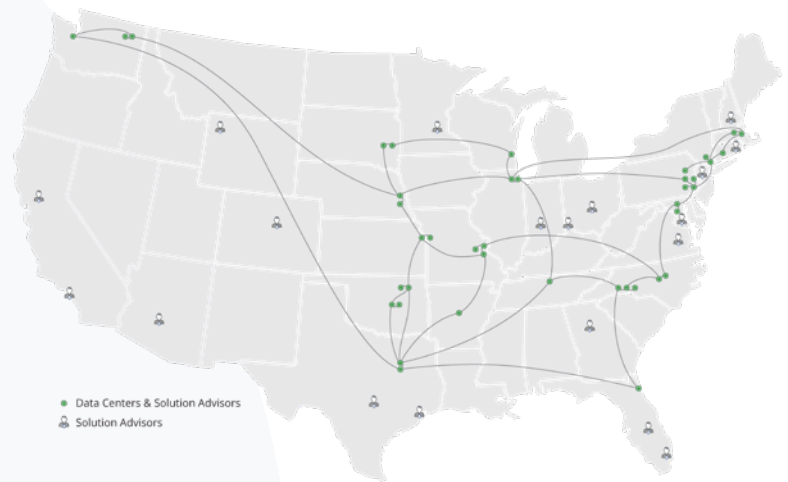

TierPoint can extend the Cloud Connect Express service over our secure national backbone and deliver it to any data center. The backbone provides diverse routing to help ensure your cloud connectivity is always available.

## Nationwide Network Brings Public Clouds Closer to You

TierPoint operates more than 40 data centers across the US with industry-leading SLAs of up to 100% uptime for reliability and availability. With high-performance managed bandwidth coast-to-coast between our data centers, and connections from an array of providers into the facilities, our network delivers the connectivity your business needs.

Get close to your customers and employees with regional TierPoint data centers for colocation and hyperscale cloud onramps. Choose a location that's close by for easy access, or one in a different region for resiliency and disaster recovery.

## Power Your Digital Breakaway

We are cloud-forward and data center-strong, a champion for untangling the hybrid complexity of modern IT, so you can free up resources to innovate, exceed customer expectations, and drive revenue. For a full scope of TierPoint services, visit [tierpoint.com](http://tierpoint.com).
