

CLOUD CONNECT EXPRESS

Connect to Hyperscale Clouds Reliably and Quickly From Every TierPoint Data Center

Bypass the internet with a private, dedicated network connection to your workloads in hyperscale public clouds from any TierPoint data center with Cloud Connect Express.

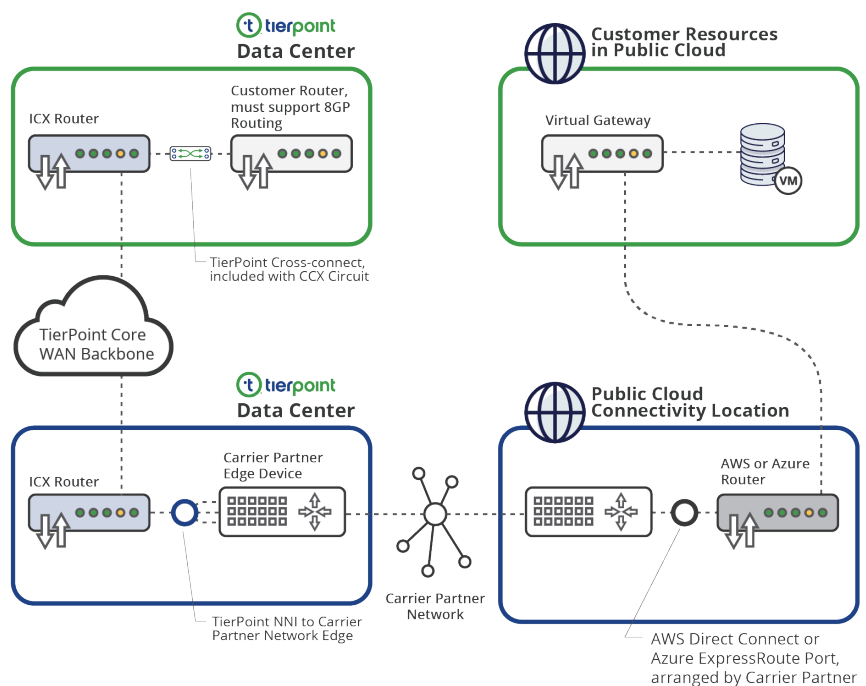

This easy and cost-effective managed network service for public cloud connectivity makes it convenient for you to improve the reliability of your cloud connections with higher bandwidth and lower latency, support your network security requirements, and get your cloud connectivity launched faster – in as little as 5-10 business days.

With the rapid growth of public cloud services in combination with legacy systems and hosted private clouds, direct connectivity is a key success factor for hybrid cloud and multi-cloud strategies.

In the cloud and in all of our data centers, TierPoint delivers secure, reliable, and interconnected infrastructure solutions. As your IT strategy evolves, we can help you to ensure the optimal placement and connectivity for your critical workloads, wherever that may be.

Managed Cloud Connectivity Gets Your Data Where It Needs To Be

Whether you're migrating to the cloud for the first time or just realigning your hybrid strategy to the needs TierPoint Cloud Connect Express fosters your business agility and network performance with direct connections – between the infrastructure you own or use in any TierPoint data center – and your workloads on Microsoft Azure and Amazon Web Services (AWS) clouds. You can choose the data that utilizes the connection and how it is routed. Redundant connections for high resiliency are available.

Cloud Connect Express Delivers Cost-effective Private Connectivity

Hybrid and Multi-Cloud – A private, segmented network connection supports hybrid environments to securely connect public cloud resources with your existing infrastructure in TierPoint facilities.

Trusted Service Provider – TierPoint embraces public cloud services such as Azure and AWS and has the expertise and commitment to link together environments from multiple providers.

Rapid Provisioning – Avoid the wait of a months-long network buildout and begin to execute on your strategic plans to grow your business in days.

Improve Reliability – A dedicated connection creates a more consistent and reliable network experience than the internet for users, replication, disaster recovery, and more.

High Performance – Optimize your network path to cloud onramps and bypass public internet congestion, high latency, and packet loss – with high-bandwidth transport to your public cloud workloads.

Simplify Complexity – Connecting to a public cloud from Tier 2 and Tier 3 markets can be complex. From procurement to equipment to implementation, TierPoint manages it for you.

Cost-Effective – TierPoint provides a cost-effective solution to enable flexible, affordable direct connections to public clouds for our customers.

Single Point of Contact – Benefit from our public cloud expertise and a single point of contact with integrated support of your public cloud, TierPoint cloud, colocation and network assets.

Nationwide Network Brings Public Clouds Closer to You

TierPoint operates more than 40 data centers across the US with industry-leading SLAs of up to 100% uptime for reliability and availability. With high-performance managed bandwidth coast-to-coast between our data centers, and connections from an array of providers into the facilities, our network delivers the connectivity your business needs.

Get close to your customers and employees with regional TierPoint data centers for colocation and hyperscale cloud onramps. Choose a location that's close by for easy access, or one in a different region for resiliency and disaster recovery.
