

TierPoint Adapt Anti-Virus

Advanced Endpoint Protection

Secure Your Hybrid Cloud Enterprise with Advanced Endpoint Protection

TierPoint Adapt Anti-Virus is part of the TierPoint Adapt Platform, a unified security framework designed to deliver end-to-end threat management. With Adapt Anti-Virus, you get a fully managed solution that protects your business from malware, ransomware, phishing, and advanced threats—across both Windows and Linux environments.

Backed by certified security experts, Adapt Anti-Virus uses machine learning, behavioral analysis, and cloud-based threat intelligence with proactive, ongoing management. That means your endpoints and servers stay safeguarded against both known and emerging attacks.

You can flexibly scale endpoint protection as your hybrid cloud environment grows. With lightweight, cross-platform coverage and centralized visibility, Adapt Anti-Virus gives you continuous defense without slowing down performance.

Our security experts partner with you to design policies that fit your performance, protection, and compliance requirements. Then we deliver proactive 24x7 management and monitoring, so you can focus on your business while we protect it.

Managed Expertise and Visibility

Security Management Center

Manage all of your Adapt Anti-Virus endpoints from a single pane of glass with real-time visibility, reporting, and policy control.

Increased Visibility

Receive weekly and customized reports that give you actionable insight into your security posture.

24x7 Administration & Monitoring

Count on TierPoint's team of security professionals for installation, policy configuration, and continuous monitoring—so you don't have to.

Comprehensive IT Alignment

As your IT strategy evolves, TierPoint meets you where you are and supports your journey with cloud, data center, and security expertise.

Key Capabilities

- + **Multi-Layer Security:** You get anti-virus, antispyware, exploit blocking, and host-based intrusion prevention for stronger protection.
- + **Advanced Threat Detection:** Detects even hidden malware with memory scanning and cloud malware protection, including sandboxing and behavioral analysis.
- + **Cross-Platform Protection:** Keep both Windows and Linux environments secure.
- + **Ransomware Protection:** Monitors applications to block ransomware-like activity before it disrupts your operations.
- + **Botnet Defense:** Detects, blocks, and reports malicious botnet communication targeting your systems.
- + **Anti-Phishing:** Prevents your users from being tricked by malicious websites or credential theft attempts.
- + **Device Control:** Stop unauthorized devices from connecting to your infrastructure.
- + **Low System Impact:** Lightweight design means your team maintains productivity without slowdowns.
- + **Network Attack Protection:** Shields your environment from spreading malware and vulnerabilities—even before patches are available.

Automated Endpoint Security with Real Intelligence

Adapt Anti-Virus strengthens your environment with real-time, automated protection that works quietly in the background. Endpoints are continuously scanned by an intelligent security engine that evaluates thousands of attributes at once, giving you rapid quarantine, cleanup, and insight. Regular full scans and automatic signature updates keep every system current and protected without added effort from your team.

Your team can also define custom monitoring rules for registry changes, processes, applications, and file activity. This behavioral oversight helps catch suspicious actions that traditional signature tools miss. Host-based intrusion prevention adds another layer of safety by watching for exploit behavior in high-risk applications like browsers, email clients, and document readers.

Adapt Anti-Virus integrates seamlessly with the wider Adapt Platform, giving you a unified approach to endpoint protection within your broader security strategy. With automation, behavioral intelligence, and expert management working together, your organization gains stronger defenses without added complexity. It is a dependable, low-friction layer of protection that supports your team, reduces risk, and helps keep your hybrid cloud environment secure as your business moves forward.

Ready to Strengthen Your Defenses?

Advanced threats need advanced protection. Call **884.267.3687** or email **sales@tierpoint.com** to get started and schedule a demo of Adapt Anti-Virus. Or visit us at **tierpoint.com** to learn more.

About TierPoint

TierPoint (tierpoint.com) is a leading provider of secure, connected IT platform solutions that power the digital transformation of thousands of clients, from the public to private sectors, from small businesses to Fortune 500 enterprises. Taking an agnostic approach to helping clients achieve their most pressing business objectives, TierPoint is a champion for untangling the complexity of hybrid, multi-platform approaches to IT infrastructure, drawing on a comprehensive portfolio of services, from public to multitenant and private cloud, from colocation to disaster recovery, security, and more. TierPoint also has one of the largest and most geographically diversified U.S. footprints, with dozens of world-class, cloud-ready data centers in 20 markets, connected by a coast-to-coast network.
