FACT SHEET

Managed Services for Azure Site Recovery

Azure Site Recovery can replicate supported workloads to Azure and coordinate failover when an outage occurs. But the service still needs to be implemented, managed, monitored, tested, and updated as your environment changes.

TierPoint helps you establish Azure as a recovery destination for supported workloads and manage the solution after implementation. Get ongoing management, testing, runbook support, and 24x7x365 access to Azure and disaster recovery expertise.

What Managed Azure Site Recovery Includes:

Reduce the Day-to-Day Management Work	Get help implementing and managing Azure Site Recovery without requiring your team to maintain specialized Azure recovery expertise in-house.
Adapt as Your Environment Changes	Update recovery configurations as workloads, infrastructure, and business requirements change.
Test the Recovery Process	Get support for recovery testing to identify configuration or process issues before an outage.
Access Azure and Recovery Expertise	Work with specialists who can support implementation, migration, testing, and ongoing management, backed by 24x7x365 support.

Start Your AI Strategy

Talk with a TierPoint expert about the workloads you need to protect, your recovery objectives, and whether Managed Azure Site Recovery fits your environment.
