SOLUTION BRIEF

RECOVERY SERVICES

Limit the Impact of Interruptions to Data, Applications, and Infrastructure

Deploy the right recovery solution for your business. Customized recovery solutions help ensure resiliency for your data, applications, and infrastructure, minimizing the impact of unexpected interruptions – every day and in a disaster.

Don't Be a Downtime Statistic

On average, businesses incur costs exceeding $100,000 for every hour of downtime.

Yet, many enterprises lack a solid disaster recovery plan, and even existing plans may fail without regular testing and updates. At TierPoint, we ensure our clients are prepared and resilient, providing expertise in establishing and maintaining effective disaster recovery strategies.

Take the Risk Out of Your Security Strategy

Every business has different disaster recovery (DR) needs. Our tailored recovery solutions can help you meet yours.

- Designed to meet your recovery point objective (RPO) and recovery time objective (RTO) requirements.

- Automate failover with DRaaS to geographically diverse clouds.

- Have peace of mind that your DR solution is reliable and secure.

- Preserve the investments you've made in your current DR technologies.

- Real-time encryption detection enables quick recovery from ransomware within minutes.

- Select from fully managed and self-service options.

Partner with the Best

One of the most common reasons disaster recovery solutions fail is because organizations try to do it all themselves. There are just too many other urgent and important initiatives vying for your time and your resources.

Our Recovery Services allow you to leverage our seasoned team of over 850 professionals across 20 markets and 40 data centers. We ensure the safety of your data and the continuous operations of your business.

Our Experts Put You First

Our customer-first culture delivers for every client. With experts across the U.S., we offer in-depth knowledge of your regional economy, and meet with you face-to-face to discuss your challenges and recovery goals.

Minimize Downtime
Failover and failback in just minutes

Secure
State-of-the-art tools protect your most sensitive data

Compliant
