

ST LOUIS - LOCUST

Our new St. Louis data center is currently under development and will be part of one of the largest and most geographically diversified footprints in the nation, improving proximity and access for you and your users. This state-of-the-art facility will be strategically located, with access to utility power and fiber routes, making it ideal for large-scale, high-density colocation services essential for AI and other GPU-accelerated workloads.

Our Commitment

Carrier Neutrality and Redundancy

This carrier-neutral facility will offer access to numerous on-net carriers and cross-connections to other carriers. Our Locust Street facility will feature redundant 100G interconnections to all 40 TierPoint Data Centers and DWDM connectivity to our two other St. Louis facilities.

Security

With a company-wide emphasis on security and compliance, our team adheres to strict, well-documented security processes.

Responsiveness and Expertise

All of our data centers are supported by passionate IT professionals focused on client success and responsiveness to client requirements. They have the technical expertise and desire to help you achieve your business goals.

Scalability

At TierPoint we scale with you. All our data centers are built to meet growing demands for disaster recovery, cloud services, and managed services.

Our Facility

National Reach

The St Louis - Locust facility will be part of one of the largest, and most geographically diverse footprints in the nation. We deliver secure, reliable, and connected infrastructure solutions.

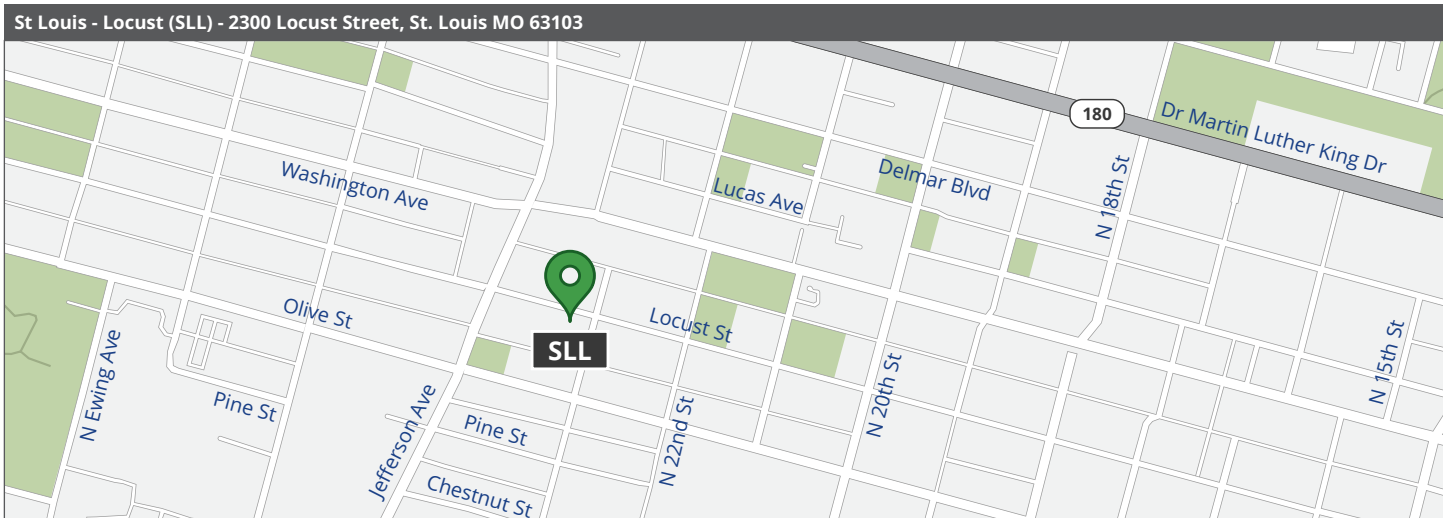

Low Latency

Achieve high performance and low latency by having your critical infrastructure closer to your employees and end-users.

Reliability

Your IT infrastructure and related components are guaranteed by a 100% uptime SLA, supported by a local, dedicated team of IT professionals who are focused on delivering consistent and superior services.
