

SPOKANE (SPO01 - 02)

Our state-of-the-art facility Spokane data center is more than 250 miles from major cities between the Cascade and Rocky Mountains providing low risk to natural disasters, and one of over 40 facilities across the US and part of a network with guaranteed exceptional performance and low latency connections. We are a trusted provider to thousands of customers across all industries. Our facility, can support whether you need a server rack, a full cabinet, or a suite of customized managed services. We have the IT professionals, security specifications, and resilient infrastructure designed to meet your business needs.

Our Commitment

Carrier Neutrality and Redundancy

By having multiple on-net carriers and supporting cross connects to other carriers, you get access to the Internet bandwidth of your choice. Multiple, diverse fiber feeds, with dark fiber connectivity available.

Security

With a company-wide emphasis on security and compliance, our professional team of experts adheres to strict, well-documented security processes.

Responsiveness and Expertise

All of our data centers are supported by passionate IT professionals focused on client success, responsiveness to client requirements, and who have the technical expertise and desire to help you achieve their business goals.

Scalability

At TierPoint we scale with you. All our data centers are built to meet growing demands for Disaster Recovery, cloud services, and managed services.

Our Facility

National Reach

One of two data centers in Spokane, WA and part of one of the largest and most geographically diverse footprints in the nation. We deliver secure, reliable and connected infrastructure solutions.

Compliance

Our Spokane (SPO01 - 02) facility is audited under SSAE 18 SOC 2 Type II, PCI-DSS*, GLBA and HIPAA standards annually and is ITAR and EU-US Privacy Shield registered.

Low Latency

Achieve high performance and low latency carrier-neutral facility by having your critical infrastructure closer to your employees and end-users.

Reliability

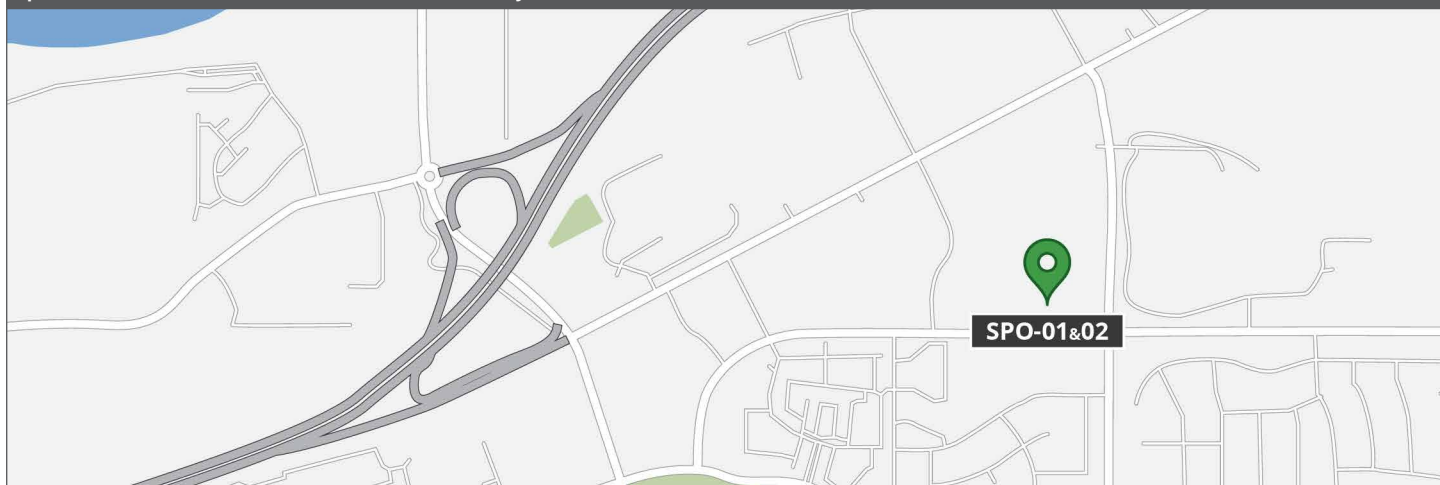

Your business critical applications are backed by a 100% uptime SLA guarantee, supported by a local and dedicated team of IT professionals who are focused on delivering consistent and superior performance.

*PCI-DSS Attestation of Compliance on Requirements 9 & 12 (Physical Security and Information Security Policies) on data center (colocation) services. Colocation provides secure space, power, and environmental controls for merchants and service providers, some of which fall under PCI compliance. No logical access to any customer systems that may contain cardholder data.
